

C PROGRAMMING: Powering Everyday Tech

ATM → Decision Making & Security in C

HOW C IS USED:
Secure PIN Check & Hardware
Interface. Logic: if/else &
while loops.

timor

flowchart

HOW C IS USED:
Handles secure PIN
verification (if/else) and login
attempts (loops). Directly
interfaces with card reader
and keypad hardware.

Elevator → Switch Case & Real-Time Control

```
switch (current_floor) {  
    case 1:  
        move_to(1);  
        break;  
}  
  
while (moving) {  
    check_sensors();  
}
```

Traffic Lights → Timers & Infinite Loops in C

Sensors

MCU

Drivers

Motor Driver

Button

HOW C IS USED:
Uses switch-case to
manage wash cycles.
Reads sensor data for
water/temp and controls
the motor driver.
